

Indian Palms HOA

TURF

Mowing – Overseeding was done last month. The first mowing will be at 1 ½” and has been completed in the areas where we initially started. Some thin areas will be refreshed with seed as needed throughout the month.

Fertilization – The first fertilization on turf will be after the first mowing.

Herbicide – No herbicide applications will be completed in the turf in November.

SHRUBS

Focus Pruning – Shrubs with sun burn damage due to the high heat, will lightly be trimmed to remove burned foliage. As the temperatures cool maintenance pruning will continue. Pruning back of bougies and Texas Rangers in common areas is the focus this month. Mexican Bird of Paradise will be trimmed back in preparation for dormancy caused by the colder weather expected later this month.

Application—Spraying weeds in shrub beds will continue throughout the month with routine gardening. Some hibiscus and bougainvillea will be sprayed for aphid and spider mite infestation as needed.

TREES

Scheduled Trimming – Pruning was completed last month.

NOVEMBER 2020 HIGHLIGHTS

Notes:

* November continues with mild temperatures that are ideal for landscapes. Reduce irrigation as the weather cools. Next month can bring freezing temperatures so major pruning and planting should be completed this month.

Annual flowers can still be planted and should be fertilized to promote as much growth as possible before the cold weather. Monitor for fungus problems and treat if necessary.

Lawns should have been overseeded and mowing will be back to weekly intervals. Irrigation should be reduced to normal levels. Fertilize after the first mowing to help lawns establish. Spot seed and top dress with seed cover where needed. The record heat in October has made overseeding especially challenging this year. We are working hard to establish high quality ryegrass turf before the cold weather.

This month is the last chance to do any major pruning before the chance of frost. Pruning on Texas ranger should be limited because they will be blooming this time of year.
