

TURF

Mowing: The height of mowing will continue to be completed at the same height for the rest of the season.

Herbicide: Sedgehammer will be applied to treat nutsedge.

SHRUBS

Focus Pruning: Heavy pruning will be avoided to prevent sun damage.

General: Some shrubs may burn, especially when temperatures exceed 110 degrees. Do not remove burned foliage at this time, it helps protect the plant from further damage. Limit pruning and planting, when possible, for the next couple of months.

TREES

Scheduled Pruning: All palm tree pruning was completed last month.

HIGHLIGHTS

Notes: July is the hottest month in the Coachella Valley. The extreme temperatures are hard on landscapes and landscape workers. Adequate irrigation is crucial to prevent damage to plant material. Even with adequate irrigation many plants will be damaged when there is consistent extreme high temperatures.
