

TURF

Mowing: Rapid growth is expected this month due to the change in the weather.

Fertilization: Fertilizer was applied last month.

Herbicide: Spot spraying will be performed for broadleaf weeds on the turf.

General: Turf will be growing vigorously. Manage fertility to prevent excessive growth. Watch for hot spots and correct irrigation deficiencies.

SHRUBS

Focus Pruning: Heavier seasonal pruning will be completed at this optimal time due to the excessive growth.

General: Shrubs will be growing vigorously. Prune to control growth. Consider use of plant growth regulators at this time. This is an ideal time for new plantings.

TREES

Scheduled Pruning: There is no tree pruning scheduled this month.

HIGHLIGHTS

Notes: It's March in the desert and spring planting season is here. Expect rapid growth in turf and plants in the landscape. Temperatures will be rising as the month progresses.
